CONTENTS VOLUME 212, Nos. 1 & 2, September 2000

CONTROL OF GENE EXPRESSION BY CATECHOLAMINES AND THE RENIN-ANGIOTENSIN SYSTEM
Drs. Heinz Rupp and Bernard Maisch

Preface 1

P. Haus-Seuffert and M. Meisterernst: Mechanisms of transcriptional activation of cAMP-responsive element-binding protein CREB 5–9
F.U. Müller, J. Neumann and W. Schmitz: Transcriptional regulation by cAMP in the heart 11–17
D. Jean and M. Bar-Eli: Regulation of tumor growth and metastasis of human melanoma by the CREB transcription factor family 19–28
Y.S. Cho-Chung, Y.G. Park, M. Nesterova, Y.N. Lee and Y.S. Cho: CRE-decoy oligonucleotide-inhibition of gene expression and tumor growth 29–34
A. von Knethen and B. Brüne: Attenuation of macrophage apoptosis by the cAMP-signaling system 35–43
U. Riese, S. Brenner, W.-D. Döcke, S. Prösch, P. Reinke, M. Oppert, H.-D. Volk and C. Platzer: Catecholamines induce IL-10 release in patients suffering from acute myocardial infarction by transactivating its promoter in monocytic but not in T-cells 45–50
J. Lim, C. Yang, S.J. Hong and K.-S. Kim: Regulation of tyrosine hydroxylase gene transcription by the cAMP-signaling pathway: Involvement of multiple transcription factors 51–60
M. Sieber-Blum and Z. Ren: Norepinephrine transporter expression and function in noradrenergic cell differentiation 61–70
J.S.D. Chan, T.-T. Wang, S.-L. Zhang, X. Chen and S. Carrière: Catecholamines and angiotensinogen gene expression in kidney proximal tubular cells 73–79
C.S. Narayanan, Y. Cui, S. Kumar and A. Kumar: cAMP increases the expression of human angiotensinogen gene through a combination of cyclic AMP responsive element binding protein and a liver specific transcription factor 81–90
P.P. Sayeski, M.S. Ali and K.E. Bernstein: The role of Ca^{2+} mobilization and heterotrimeric G protein activation in mediating tyrosine phosphorylation signaling patterns in vascular smooth muscle cells 91–98
S. Meloche, S. Pelletier and M.J. Servant: Functional cross-talk between the cyclic AMP and Jak/STAT signaling pathways in vascular smooth muscle cells 99–109
X. Wang and T.J. Murphy: The inducible cAMP early repressor ICERIIγ inhibits CREB and AP-1 transcription but not AT_1 receptor gene expression in vascular smooth muscle cells 111–119
S.J. Vyas, C.M. Blaschak, M.R. Chinoy and E.K. Jackson: Angiotensin II-induced changes in G-protein expression and resistance of renal microvessels in young genetically hypertensive rats 121–129
A. Dagnino-Subiabre, K. Marcelain, C. Arriagada, I. Paris, P. Caviedes, R. Caviedes and J. Segura-Aguilar: Angiotensin receptor II is present in dopaminergic cell line of rat substantia nigra and it is down regulated by aminochrome 131–134
H. Rupp, M. Benkel and B. Maisch: Control of cardiomyocyte gene expression as drug target 135–142
D. Mohuczy and M.I. Phillips: Designing antisense to inhibit the renin-angiotensin system 145–153
A.R. Brasier, M. Jamaluddin, Y. Han, C. Patterson and M.S. Runge: Angiotensin II induces gene transcription through cell-type-dependent effects on the nuclear factor-κB (NF-κB) transcription factor 155–169
E. Mascareno and M.A.Q. Siddiqui: The role of Jak/STAT signaling in heart tissue renin-angiotensin system 171–175
R. Aikawa, I. Komuro, R. Nagai and Y. Yazaki: Rho plays an important role in angiotensin II-induced hypertrophic responses in cardiac myocytes 177–182
L.M. Khachigian, Y. Takuwa and T. Collins: Mechanisms of angiotensin II-induced platelet-derived growth factor gene expression 183–186
H. Matsubara, Y. Moriguchi, Y. Mori, H. Masaki, Y. Tsutsumi, Y. Shibasaki, Y. Uchiyama-Tanaka, S. Fujiyama, Y. Koyama, A. Nose-Fujiyama, S. Iba, E. Tateishi and T. Iwasaka: Transactivation of EGF receptor induced by angiotensin II regulates fibronectin and TGF-β gene expression via transcriptional and post-transcriptional mechanisms 187–201
K. Tamura, Y.E. Chen, Q. Chen, N. Nyui, M. Horiuchi, I. Takasaki, N. Tamura, R.E. Pratt, V.J. Dzau and S. Umemura: Expression of renin-angiotensin system and extracellular matrix genes in cardiovascular cells and its regulation through AT1 receptor 203–209
D.H. Wang and J. Li: Regulation of angiotensin II receptors in the medullary thick ascending limb 211–217
M. Turcani and H. Rupp: Bradykinin (B_2) independent effect of captopril on the development of pressure overload cardiac hypertrophy 219–225
S. Takeo, Y. Nasa, K. Tanonaka, F. Yamaguchi, K.-I. Yabe, H. Hayashi and N.S. Dhalla: Role of cardiac renin-angiotensin system in sarcoplasmic reticulum function and gene expression in the ischemic-reperfused heart 227–235
